Use of Non-GAAP Financial Information

Generally Accepted Accounting Principles (GAAP) is the term used to refer to the standard framework of guidelines for financial accounting. GAAP includes the standards, conventions, and rules accountants follow in recording and summarizing transactions and in the preparation of financial statements. In addition to reporting financial results in accordance with GAAP, the Company has provided non-GAAP financial measures, which it believes are useful to help investors better understand its financial performance, competitive position and prospects for the future. These non-GAAP measures include earnings before interest, taxes and depreciation and amortization (EBITDA), adjusted earnings before interest, taxes and depreciation and amortization (Adjusted EBITDA), adjusted earnings before interest, taxes and depreciation as a percent of adjusted revenue (Adjusted EBITDA margin), adjusted pre-tax earnings from continuing operations, adjusted pre-tax earnings from continuing operations as a percentage of adjusted revenue (Adjusted pre-tax margin from continuing operations), adjusted net earnings and adjusted EPS.

Any non-GAAP measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP net earnings.
