[&]quot;This was another solid quarter for our title insurance business," said Chairman William P. Foley, II. "In particular, refinance order volumes showed strength throughout the quarter, moving from 10,500 open orders per day in July to more than 11,400 open orders per day in both August and September. For the quarter, refinance orders comprised approximately 67% of total open orders and 63% of closed orders, with closed refinance orders peaking at 67% of total closed orders during the month of September. While we started to see an increase in closing activity later in the quarter, a large number of the third quarter open orders will actually close during the fourth quarter, providing further earnings momentum as we close out 2010.

"During the quarter, we sold approximately half of our investment in FIS stock through that company's August tender offer, selling 1.6 million shares at the tender price of \$29. This resulted in total proceeds of nearly \$47 million, a pre-tax gain of approximately \$22 million. We continue to own another 1.6 million shares of FIS with a current value of approximately \$45 million.

"There has been significant discussion and speculation concerning our involvement with foreclosures and potential risks we face from those transactions. Many lenders have announced that they have halted foreclosures and the sale of REO properties due to possible flaws in documentation used in the foreclosure process. We do not believe that this situation will have a material adverse impact on our title business. FNF's title insurance underwriters issue title policies on REO properties to new purchasers and lenders to those purchasers. FNF believes that these policies will not result in additional claims exposure to FNF because the new owners and their lenders would have the rights of good faith purchasers which should not be affected by potential defects in documentation. Even if a court sets aside a foreclosure due to a defect in documentation, the foreclosing lender would be required to return all funds obtained from our insureds, resulting in no loss under the title insurance policy.

"Additionally, we recently reached an agreement with Bank of America under which they will provide a representation that all documentation, procedures and/or notices related to the foreclosure of a property comply with state law and local practice and they will indemnify FNF against any losses incurred directly by their failure to comply with state law or local practice on both transactions in which foreclosure has already occurred or been initiated and those to be initiated in the future. We believe that this agreement reflects current law in every state and is consistent with the rights that we have under the policies we issue. We will also require similar representation and indemnification on future REO banked-owned transactions from all other lenders."

Conference Call
