#### 1. Summary of Significant Accounting Policies:

The financial statements of Alamo Title Insurance are presented on the basis of accounting practices prescribed or permitted by the State of Texas Department of Insurance.

#### A. Accounting Practices:

To the extent possible, the accompanying financial statements have been prepared in substantial conformity with the NAIC Accounting Practices and Procedures manual, except where the laws of the State of Texas differ. Significant variances between Texas basis of accounting and NAIC SAP are: investments in title plants are limited in Texas to 100% of an insurer's capital stock, with the approval of the Commissioner, with a limit of one plant per county, as compared to NAIC SAP which allows the lesser of 20% of admitted assets or 40% of surplus, without a per county limitation; and recovery rates on amounts set aside in the statutory premium reserves differ.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Texas for December 31, 2016 and December 31, 2015 is shown below:

	SSAP#	F/S Page	F/S Line #	12/31/2016	12/31/2015

State Prescribed Practices (Income): Statutory Premium Reserve					
Recovery, net of tax	57	3	2	(80,393)	(108,070)

Statutory Surplus, Texas Basis				\$ 24,723,988	\$ 28, 186,152
State Prescribed Practices (Surplus):					
Statutory Premium Reserve	57	3	2	1,005,567	1,085,960
Title Plants	57	2	13	1,180	1,180
Statutory Surplus, NAIC SAP Basis				\$ 25,730,735	\$ 29,273,292

#### B. <u>Use of Estimates in the Preparation of the Financial Statements:</u>

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

#### C. Accounting Policy:

A portion of title insurance premiums written, escrow fees and other title fees is deferred and set aside in the statutory premium reserve which is computed and amortized in accordance with accounting practices prescribed by the Texas Department of Insurance. The remaining portion of title insurance premiums, escrow fees and other title fees are recognized at the time of the closing of the related real estate transaction.

Amounts paid to or retained by title agents are recognized as an expense when incurred.

In addition, the company uses the following accounting policies:

- (1) Short term investments are stated at amortized cost.
- (2) Bonds are stated at amortized cost using the effective interest method with exception to those bonds with a NAIC designation of 3-6, which are stated at the lower of amortized cost or market value.
- (3) Unaffiliated common stock holdings are stated at NAIC market value.
- (4) Redeemable preferred stocks are stated at amortized cost. Perpetual preferred stocks are stated at fair value. Non-investment grade preferred stocks are stated at the lower of amortized cost or fair value.
- (5) Mortgage Loans on Real Estate are stated at the aggregate carrying value less accrued interest.
- (6) Loan-backed securities, if any, are stated at amortized cost or the lower of amortized cost or market value.
- (7) Investment in Subsidiaries, Controlled or Affiliated Companies are valued using the underlying statutory equity, as adjusted, or audited GAAP equity, as appropriate for each individual investment.
- (8) Interest in Joint Ventures are valued based on the underlying audited GAAP equity of the investee, and may include adjustments for certain non-admitted assets depending on the ownership interest in the investee and the nature of the joint venture.
- (9) Derivatives None
- (10) Anticipated investment income to be used as a factor in a premium deficiency calculation None
- (11) Unpaid losses and loss adjustment expense include an amount determined from individual case estimates and loss reports. Such liabilities are necessarily based on assumptions and estimates. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.

- (12) The Company has not modified its capitalization policy from the prior period.
- (13) The Company has no pharmaceutical rebate receivables.

- E. Joint and Several Liabilities Not Applicable.
- F. All Other Contingencies:

In the ordinary course of business, we are involved in various pending and threatened litigation matters related to our operations, some of which include claims for punitive or exemplary damages. This customary litigation includes but is not limited to a wide variety of cases arising out of or related to title and escrow claims, for which we make provisions through our loss reserves. Additionally, like other insurance companies, our ordinary course litigation includes a number of class action and purported class action lawsuits, which make allegations related to aspects of our insurance operations. We believe that no actions depart from customary litigation incidental to our business.

We review lawsuits and other legal and regulatory matters (collectively "legal proceedings") on an ongoing basis when making accrual and disclosure decisions. When assessing reasonably possible and probable outcomes, management bases its decision on its assessment of the ultimate outcome assuming all appeals have been exhausted. For legal proceedings in which it has been determined that a loss is both probable and reasonably estimable, a liability based on known facts and which represents our best estimate has been recorded. None of the amounts we have currently recorded are considered to be material to our financial condition individually or in the aggregate. Actual losses may materially differ from the amounts recorded and the ultimate outcome of our pending legal proceedings is generally not yet determinable. While some of these matters could be material to our operating results or cash flows for any particular period if an unfavorable outcome results, at present we do not believe that the ultimate resolution of currently pending legal proceedings, either individually or in the aggregate, will have a material adverse effect on the Company's financial condition.

From time to time we receive inquiries and requests for information from state insurance departments, attorneys general and other regulatory agencies about various matters relating to our business. Sometimes these take the form of civil investigative demands or subpoenas. We cooperate with all such inquiries and we have responded to or are currently responding to inquiries from multiple governmental agencies. Also, regulators and courts have been dealing with issues arising from foreclosures and related processes and documentation. Various governmental entities are studying the title insurance product, market, pricing, and business practices, and potential regulatory and legislative changes, which may materially affect our business and operations. From time to time, we are assessed fines for violations of regulations or other matters or enter into settlements with such authorities which may require us to pay fines or claims or take other actions.

#### 20. Fair Value Measurements:

#### A. Valuation Techniques for Fair Value Measurement

The company's Level 2 fair value measures for investments available for sale are provided by third-party pricing services. One firm is utilized for the taxable portfolio and another for the tax-exempt bond portfolio. These pricing services are leading global providers of financial market data, analytics and related services to financial institutions. Only one price is relied upon for each applicable instrument to determine the fair value. The inputs utilized in these pricing methodologies include observable measures such as benchmark yields, reported trades, broker dealer quotes, issuer spreads, two sided markets, benchmark securities, bids, offers and reference data including market research publications. Management reviews the pricing methodologies for all Level 2 securities by obtaining an understanding of the valuation models and assumptions used by the third-party as well as independently comparing the resulting prices to other publicly available measures of fair value and internally developed models. The pricing methodologies used by the relevant third-party pricing services are:

U.S. government and agencies: These securities are valued based on data obtained for similar securities in active markets and from inter-dealer brokers.

States, territories, possessions, political subdivisions, special revenue and special assessment obligations: These securities are valued based on data obtained for similar securities in active markets and from inter-dealer brokers. Factors considered include relevant trade information, dealer quotes and other relevant market data.

Industrial and miscellaneous securities: These securities are valued based on dealer quotes and related market trading activity. Factors considered include the bond's yield, its terms and conditions, or any other feature which may influence its risk and thus marketability, as well as relative credit information and relevant sector news.

Mortgage-backed/asset-backed securities: These securities are comprised of commercial mortgage-backed securities, agency mortgage-backed securities, collateralized mortgage obligations, and asset-backed securities. They are valued based on available trade information, dealer quotes, cash flows, relevant indices and market data for similar assets in active markets.

Preferred stock: Preferred stocks are valued by calculating the appropriate spread over a comparable US Treasury security. Inputs include benchmark quotes and other relevant market data.

- F. Subprime Mortgage Related Risk Exposure

The subprime lending sector, also referred to as B-paper, near-prime, or second chance lending, is the sector of the mortgage lending industry which lends to borrowers who do not qualify for prime market interest rates because of poor or insufficient credit history. The term also refers to paper taken on property that cannot be sold on the primary market, including loans on certain types of investment properties and certain types of self-employed individuals. Instability in the domestic and international credit markets due to problems in the subprime sector dictates the need for additional information related to exposure to subprime mortgage related risk.

For purposes of this disclosure, subprime exposure is defined as the potential for financial loss through direct investment, indirect investment, or underwriting risk associated with risk from the subprime lending sector. For purposes of this note, subprime exposure is not limited solely to the risk associated with holding direct mortgage loans, but also includes any indirect risk through investments in debt securities, asset backed or structured securities, hedge funds, common stock, subsidiaries and affiliates, and insurance product issuance. Although it can be difficult to determine the indirect risk exposures, it should be noted that not only does it include expected losses; it also includes the potential for losses that could occur due to significantly depressed fair value of the related assets in an illiquid market.

As it relates to the exposure described above, the following information is disclosed:

- (1) Direct exposure through investments in subprime mortgage loans None.
- (2) Indirect exposure to subprime mortgage risk through investments in the following securities None.
- (3) Underwriting exposure to subprime mortgage risk None.

As of December 31, 2016, \$1.6 million has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Therefore, there has been a \$2.3 million unfavorable (favorable) prior-year development since December 31, 2015. The increase (decrease) is generally the result of ongoing analysis of recent loss development trends. Original estimates are increased or decreased as additional information becomes known regarding individual claims.
