"The highlight of the first quarter was the continuation of the strong open order volumes that began in very late 2008," said Chairman William P. Foley, II. "The significant strength in refinance volumes has, however, caused an increase in the time it takes to close an order, as we really only began to see an increase in closed order volumes during the later part of the quarter. We expect that trend in increased closed orders to continue as we head into the second quarter. Additionally, we saw a surge in open order volumes in the first three weeks of April, nearing their highest levels of 2009."

"We also made significant strides on the integration of the Lawyers and Commonwealth operations during the quarter, realizing run-rate cost savings of more than \$231 million as of March 31, 2009, versus our original synergy estimate of \$150 million and our revised synergy estimate of \$225 million. Most importantly, the Lawyers and Commonwealth operations returned to profitability for the month of March, before the impact of the synergy bonus, and these underwriters are positioned to generate increasing profit margins as we enter the second quarter and beyond."

"As we discussed during our recent equity offering, operating performance in our title business began the quarter slowly, but picked up as we got into the month of March. In January, we recorded a pre-tax loss of approximately \$11 million, as the legacy FNF business was profitable, but the Lawyers and Commonwealth operations lost more than \$17 million on a pre-tax basis. In February we recorded a pre-tax loss of approximately \$5 million, as legacy FNF was again slightly profitable and the Lawyers and Commonwealth operations improved to a pre-tax loss of only \$5 million. In March, we recorded \$15 million in pre-tax earnings, but those results included a \$20 million synergy bonus and approximately \$6 million in other than temporary impairments related to several equity securities. Before those two items, we generated approximately \$41 million in pre-tax earnings, which we believe to be a more meaningful representation of our operating performance in March, as legacy FNF generated a high single digit margin for the month and the Lawyers and Commonwealth operations recorded a mid-single digit margin."

"Finally, on April 20, 2009, we closed on a public offering of our common stock for net proceeds of approximately \$331 million. There were two primary reasons for the issuance of stock. First, we will repay \$135 million under our existing credit facility on

April 30, 2009. We are also examining the option of repurchasing a meaningful amount of our existing bonds, both of which will reduce our debt to total capital ratio from approximately 32% to somewhere near 25%, a level more in-line with our historic debt to cap targets. This reduction in leverage will provide increased financial flexibility for FNF. Second, as the leading title insurance company in the country, we believe the strength of our balance sheet, including unrivaled claims reserves, shareholders' equity, investment portfolio and modest financial leverage, will allow us to differentiate ourselves in the marketplace, particularly in the commercial area."

"Overall, we believe we accomplished many things in the first quarter that have us well prepared for the future. We quickly rationalized and integrated the Lawyers and Commonwealth operations and returned them to operational profitability in March, claims trends continued to be extremely positive and the equity offering will reduce leverage on our balance sheet. In addition, order counts continue to surge and we feel well positioned to take advantage of a stronger market as we enter the second quarter."

Fidelity National Financial, Inc. (NYSE:FNF), is a leading provider of title insurance, specialty insurance, claims management services and information services.
