"Our strong fourth quarter results rounded out a banner year for our title business. In the quarter we generated adjusted pre-tax title earnings of \$355 million and an adjusted pre-tax title margin of 16.3%. Total commercial revenues were \$321 million for the quarter which compares favorably to the record breaking results that we posted in the 2018 fourth quarter where total commercial revenues were \$328 million," commented Chairman William P. Foley, II. "For the full year 2019, we generated adjusted pre-tax title earnings of \$1.3 billion, a record year, and an adjusted pre-tax title margin of 16.3%, our best year since 2003. Looking ahead to 2020, we expect mortgage originations to moderate through the year from the very strong levels enjoyed in 2019 as refinance volumes naturally ease. We will remain vigilant on expenses as we manage this expected slowdown in volumes.

Following the termination of the merger agreement with Stewart Information Services, the Board and management underwent a comprehensive review of FNF's capital allocation strategy and determined that expanding into the annuity market through the acquisition of FGL Holdings ("F&G"), announced subsequent to quarter end, would best maximize value for our shareholders. After three years as a minority owner and with the advent of new leadership at F&G, we decided to acquire the remaining interest in F&G as a way to diversify our earnings and reduce the risk and volatility inherent in our stand-alone title operations. F&G offers an attractive return on our capital investment in an industry with strong secular growth tailwinds that will perform well in economic environments that may be more challenging for title insurance. FNF is excited to welcome F&G's employees and policy holders to the FNF family."

Mr. Foley concluded, "In 2019 the Board focused on returning capital to shareholders having increased our quarterly cash dividend 6.5% to \$0.33 per share in addition to repurchasing 2,120,000 shares throughout the year. FNF's share repurchase plan has 22.2 million shares remaining on the authorization. The Board will continue to evaluate capital allocation including share repurchases, dividends, debt paydown and further investments in our business segments."

Conference Call

The access code will be 13697834.

About Fidelity National Financial, Inc.

Fidelity National Financial, Inc. (NYSE: FNF) is a leading provider of title insurance and transaction services to the real estate and mortgage industries. FNF is the nation's largest title insurance company through its title insurance underwriters - Fidelity National Title, Chicago Title, Commonwealth Land Title, Alamo Title and National Title of New York - that collectively issue more title insurance policies than any other title company in the United States. More information about FNF can be found at fnf.com.

Use of Non-GAAP Financial Information

Generally Accepted Accounting Principles (GAAP) is the term used to refer to the standard framework of guidelines for financial accounting. GAAP includes the standards, conventions, and rules accountants follow in recording and summarizing transactions and in the preparation of financial statements. In addition to reporting financial results in accordance with GAAP, FNF has provided non-GAAP financial measures, which it believes are useful to help investors better understand its financial performance, competitive position and prospects for the future. These non-GAAP measures include adjusted pre-tax earnings, adjusted pre-tax earnings as a percentage of adjusted revenue (adjusted pre-tax title margin), adjusted net earnings, and adjusted EPS. Any non-GAAP measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP net earnings. Further, FNF's non-GAAP measures may be calculated differently from similarly titled measures of other companies. Reconciliations of these non-GAAP measures to related GAAP measures are provided below.

Forward-Looking Statements and Risk Factors

This press release contains forward-looking statements that involve a number of risks and uncertainties. Statements that are not historical facts, including statements regarding our expectations, hopes, intentions or strategies regarding the future are forward-looking statements. Forward-looking statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. Because such statements are based on expectations as to future financial and operating results and are not statements of fact, actual results may differ materially from those projected. We undertake no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise. The risks and uncertainties which forward-looking statements are subject to include, but are not limited to: the ability to consummate the proposed F&G transaction; the ability to obtain requisite regulatory, shareholder and stockholder approval and the satisfaction of other conditions to the consummation of the proposed F&G transaction on relationships, including with employees, suppliers, customers and competitors; changes in general economic, business and political conditions, including changes in the financial markets; weakness or adverse changes in the level of real estate activity, which may be caused by, among other things, high or increasing interest rates, a limited supply of mortgage funding or a weak U. S. economy; our potential inability to find suitable acquisition candidates; our dependence on distributions from our title insurance underwriters as a main source of cash flow; significant competition that F&G and our operating subsidiaries face; compliance with extensive government regulation of our operating subsidiaries; and other risks detailed in the "Statement Regarding Forward-Looking Information," "Risk Factors" and other sections of FNF's Form 10-K and other filings with the Securities and Exchange Commission ("SEC").

**During Q4 2019 we established an automated payroll data feed, based on hours worked, as a new process to determine number of field operation employees. This new process captures shared services and other operational employees that were not previously included. All previous periods have been restated using the new method.
